

About the Science

Stardatecards™© Eternal Memorials were developed in Canada with funding from the National Research Council of Canada and operated through a partnership with Science Alive! The New Zealand Science Centre, a public trust in Christchurch, who send messages and manage quality assurance of transmission.

For more information visit www.fischersfuneralservices.com and watch two videos under the page Stardatecards™© Eternal Memorials.

Stardatecards™© Eternal Memorials provides information on where to locate your commemoration in the night sky.

Complete this questionnaire or on-line and receive a free text deep space communication.

To send your message, please send the text you wish transmitted to adesarn@shaw.ca.

Please forward completed surveys to:

Fischer's Funeral Services
4060 1st Ave SW, Salmon Arm,
B.C. V1E 2Y9 Fax: 250.833.4782

To complete the survey on-line please visit: <http://bit.ly/1yyhrJd>

Stardatecards™©
Eternal Memorials

Nothing says "I will remember you" more...than to say it forever.

About Stardatecards™©

Stardatecards™© Eternal Memorials is a service that allows the public to truly commemorate family and loved ones - for eternity. Stardatecards™© are laser light messages created by the bereaved and sent to the far reaches of the Universe, literally to the end of space and time.

Stardatecards™© Eternal Memorials utilizes a specialized communications laser connected to a computer driven telescope to achieve deep space communication. The bereaved provide the text of the commemoration and a photo image of their loved one which is entered into the Stardatecards™© web site.

The commemoration is then transmitted to a visible night sky astronomical object – a star, star system or galaxy - selected by the consumer. The message will travel amongst the stars forever.

Stardatecards™© provides a very unique way to offer a tribute to a loved one while providing an equally unique way to remember them – by being able to look skyward each night to see the far away destination the memorial will travel toward and beyond - for all time.

Message senders are able to monitor their tributes transmission time and date and then follow the message's journey on-line. ***A small investment to say I love and will remember you, forever.***

The following questionnaire seeks your input into this science based bereavement service, what type of products may interest you, and the cost. To complete the survey on-line please visit: <http://bit.ly/1yyhrJd>.

Does the use of deep space communication interest you as a means of commemorating a loved one? Yes___ No___

Does the aspect of a commemoration's journey being eternal appeal to you? Yes___ No___

Does the aspect of being able to look into the night sky and see the star that your message is traveling toward appeal to you as a feature of a bereavement product? Yes___ No___

Does the ability to follow your bereavement message on-line interest you? Yes___ No___

Would you be interested in having a print certificate of the transmission date and time and containing the image and text that was sent in the commemoration? Yes___ No___

Would you be interested in having the commemoration message added to an urn or gravestone? Yes___ No___

The retail price for a Eternal Memorial is \$125.00 and provides transmission and a confirmation document including how to find your star in the night sky and how to track the message's journey online. Is this a bereavement service and product you would consider to commemorate a loved one? Yes___ No___
